STATE OF IOWA, CERTIFICATE OF NURSERY INSPECTION

Office of State Entomologist, Ames, Iowa

This is to certify that in accordance with Chapter 53 of the Acts of the Twenty-seventh General Assembly, as amended by the Thirty-first General Assembly (Code Section 2575-a51,) the nursery stock for sale by the Mount Arbor Nurseries, E. S. Welch, Propr., of Shenandoah, Iowa, has been inspected by a duly authorized inspector and has been found apparently free from dangerous injurious insects and plant diseases.

This certificate is invalid after July 1, 1915.

Certificate No. 1.

Dated 3 July, 1914.

H. E. SUMMERS,
State Entomologist.

SPRING OF 1915

ESTABLISHED 1875

Wholesale Trade List
OF THE
Mount Arbor Nurseries
E. S. WELCH, Proprietor
Shenandoah, Iowa

We Offer One of the Largest and Most Complete Lines of General Nursery Stock
in the United States.

Long Distance Bell :: TELEPHONES :: Mutual No. 385

TO THE TRADE:

In presenting our twenty-fourth Annual Spring List, I wish to thank our many customers for the liberal trade extended us in the past and to assure you of our appreciation of your continued patronage, which we shall make every effort to merit.

We urgently request correspondence and trial orders from new customers, feeling confident that you will be well pleased with our stock and method of doing business.

We have added to our equipment and plant until we have one of the most complete and best equipped nursery plants to be found anywhere, placing us in a position to give the best of service.

Stock Handled Under Cover—We have the exposure of stock reduced to the minimum. After digging, all stock is immediately sent to our large packing houses where it is graded, packed and handled under cover. Customers may rely on receiving stock in prime condition.

Large Assortment of Stock in Storage. Shipments Made At Any Time.

Everything offered is young, thrifty, well-grown stock and graded to the highest standard.

We are always pleased to submit prices by letter on large lists of wants.

LOCATION AND SHIPPING FACILITIES

We are located in Southwest Iowa, fifty miles from Omaha, on well drained land, and have a fertile soil that cannot be surpassed in the United States. Three railroads, (C. B. & Q., Wabash and K. & W.) afford competition in freight rates and a rapid and convenient shipping outlet in every direction. Two express companies (Adams and Wells Fargo) also give excellent service.

STORAGE

Our modern Storage Buildings are especially designed for handling Nursery Stock in the best possible manner, enabling us to get the stock to our customers in prime condition. You should consider this in buying.

TERMS AND CONDITIONS

SHIPPING—Please give shipping directions, whether by freight or express, also route. If no directions are given we will forward to the best of our judgment, without assuming responsibility, as all goods travel at the purchaser's risk and expense. Our shipping season usually begins the last of September and continues throughout the winter and spring.

PACKING—Prices quoted are net, boxing and baling additional, for which we charge to cover cost. Particular care is taken to pack all stock in a thorough manner so that it will reach destination in prime condition.

TERMS—Cash or satisfactory security, except we extend the usual terms of credit, to known, responsible nurserymen. Orders to be sent C. O. D. should be accompanied by one-fourth cash to receive prompt attention.

PRICES—The quotations in this list are for the wholesale trade only, and limited to the Spring of 1915. Should prices change either higher or lower, during the season, the prices made at the time an order is accepted are expected to stand.

RATES—Fifty trees, of not less than ten of a variety, will be furnished at hundred rates; three hundred trees of not less than ten of a variety at thousand rates. Long list of varieties of a few trees of a kind subject to higher prices. All trees above the $\frac{1}{2}$ to $\frac{5}{8}$ grades are tied in bundles of ten in grading. Order tens or multiples of ten of a variety as far as possible.

CAUTION—We accept all orders on the condition that they shall be void should injury befall our stock from frost, hail, fire or other causes over which we have no control.

GRADES—We grade carefully, in some cases by caliper, in others by height. When graded by both caliper and height the caliper must govern.

Dealers wishing to pack on our grounds will find our facilities first class and their order will receive prompt attention.

CLAIMS—All claims for errors and deductions must be made within ten days after receipt of goods.

GUARANTEE OF GENUINENESS—While we exercise the utmost diligence and care to have our varieties true to name, and hold ourselves in readiness on proper proof, to replace all trees, etc., that may prove otherwise, or refund the amount paid, it is mutually understood and agreed between the purchaser and ourselves that we shall in no case be liable for any sum greater than the amount originally received for said trees, etc., that prove untrue.

Correspondence and inspection invited.

MOUNT ARBOR NURSERIES

B. V. Lake

FEB 2 1915

MOUNT ARBOR NURSERIES, SHENANDOAH, IOWA

1

GRADE COUNT—For the benefit of customers we give an approximate grade count of number, size and variety unsold at this date, of our principal surplus. Customers in ordering should give second choice in varieties and sizes as far as possible, especially if in a hurry for shipment, as we do not substitute or make any changes without permission.

HEIGHT AND CALIPER—Height given of fruit trees is approximate and represents the average height of most varieties. Slow growing kinds will fall short of height specified, as it is intended that the caliper shall govern.

APPLES

Our apples are a fine lot of well grown trees with a strong root system. The grafted ones having been cut back when one-year, and then grown two years. Have a good lot of 2 year buds in a few leading varieties. All mighty good values at prices we are quoting.

Prices except as otherwise noted.

ROOT GRAFTS

Ever since the Mount Arbor Nurseries were established in 1875, growing Apple Seedlings, Apple trees and making Apple Grafts for the trade and our own planting has been one of our specialties. For this work we employ only skilled labor and select the best of material. We use Orchard Scions as far as possible and vigorous healthy Seedlings, carefully selected when grading our block of seedlings.

All grafts are carefully assorted and only the best of material used in orders, so that customers can depend upon getting a first class article. Orders should be placed early to procure the best selection of varieties and to give the Grafts ample time to callous before shipment. After our grafts are made they are tied in bundles of 100, each bunch carefully labeled and packed away to callous.

Our Piece-Root Grafts are made with a six-inch Scion and three and one-half inch Root, the same style that we make largely for our own planting. For Whole-Root Grafts we use the entire Seedling, either a straight or branched root as the customer may select. Any style of Graft made to order.

WHOLE ROOT GRAFTS

Some of our customers get best results from Planting Whole Root Grafts, which are made with a Scion about six inches in length and a branched or straight Seedling. We recommend a strong branched Seedling as it will usually give the best results.

Grafts should be planted at the earliest date in the Spring the season will permit, in rows about three and one-half feet apart and seven to eight inches apart in the row. The ground should be plowed deep (in the fall preferred) and well prepared before planting.

Machine Wrapped Grafts

We use Graft Wrapping Machines run with electric motor for wrapping Grafts. We have been able to do much better wrapping of the union of the Grafts and are confident the continuous machine wrapping will materially reduce the percentage of crown gall, which frequently develops about the union of Root and Scion in grafted Apple Trees.

George G. Hedgcock, Pathologist of the U. S. Department of Agriculture, conducted extensive experiments in his "field studies of the crown gall and hairy root of the Apple Tree," (See Bulletin No. 186 Bureau of Plant Industry) and according to his experiments there was a difference in percentage of crown gall of nineteen per cent. in favor of the continuous thread wrapping; aside from an increase in the stand of 10.2 per cent.
